Chmura publiczna

The diagram illustrates a multi-region public cloud architecture. It is divided into two main regions: Region 1 and Region 2. Region 1 contains a large green box labeled 'Portal przedsiębiorcy' and a large blue box labeled 'Portal instytucji'. Region 2 contains a large green box labeled 'Portal przedsiębiorcy' and a large blue box labeled 'Portal instytucji'. To the right of the portals, there is a column of services: IAM/Zdalny dostęp (containing Zarządzanie tożsamością, Uwierzytelnianie, and VPN Gateway), CI/CD/IaC, Zbieranie/analiza logów, Monitorowanie aplikacji/usług, and Kopia zapasowa. Below these services, there is a Bastion Host. The entire architecture is labeled 'Chmura publiczna' at the top.

Region	Portal przedsiębiorcy	Portal instytucji	IAM/Zdalny dostęp	CI/CD/IaC	Zbieranie/analiza logów	Monitorowanie aplikacji/usług	Kopia zapasowa
Region 1	Portal przedsiębiorcy	Portal instytucji	Zarządzanie tożsamością				
			Uwierzytelnianie				
			VPN Gateway				
Region 2	Portal przedsiębiorcy	Portal instytucji	Bastion Host				

Region 1

The diagram illustrates the architecture of Region 1. It features a large green box labeled 'Portal przedsiębiorcy' and a large blue box labeled 'Portal instytucji'. To the right of these portals are several service components: 'IAM/Zdalny dostęp' (containing 'Zarządzanie tożsamością' and 'Uwierzytelnianie'), 'VPN Gateway', 'CI/CD/IaC', 'Zbieranie/analiza logów', 'Monitorowanie aplikacji/usług', and 'Kopia zapasowa'. A vertical label 'PREZENTACJA' is positioned to the left of the portals.

Zarządzanie tożsamością

Uwierzytelnianie

VPN Gateway

The diagram illustrates a multi-region architecture. It is divided into two main horizontal sections: Region 1 (top) and Region 2 (bottom). Each region contains a central Bastion Host (represented by a box labeled 'Bastion Host') and a fleet of EC2 instances (represented by multiple boxes labeled 'EC2'). The Bastion Hosts are connected to the EC2 instances within their respective regions. The diagram also shows connections between the Bastion Hosts across regions, indicating a cross-region management or access path.

The diagram illustrates a cloud architecture with two data centers (DC 1/DC 2) and a central cloud layer. The data centers are represented by large green and blue rectangles. The central cloud layer is divided into several functional areas:

- IAM/Zdalny dostęp** (Identity and Access Management/Remote Access): Includes Zarządzanie tożsamością (Identity Management), Uwierzytelnianie (Authentication), and Bastion Host.
- Source Code Repository**
- Container Registry**
- Artifacts Repository**
- Build Server/Deployment Pipelines**
- Application Logs**
- Infrastructure Logs**
- Security Logs**
- Application Monitoring**
- Performance Monitoring**
- Infrastructure Monitoring**
- Security Monitoring**
- Alerting/Event Management**
- BaaS** (Backend as a Service)

The data centers are labeled **TRANSAKCJE** (Transactions) and **ANALITYKA** (Analytics). The central cloud layer is labeled **OChK/Chmura** (On-premise/Cloud) and **DC 1/DC 2**.
